

This catalog presents the Panzerschiffe line of 1/2400 scale waterline ships and games. Our ships are true scale epoxy castings in realistic colors. They are very durable with no parts to assemble or lose. They can also be easily painted with hobby paints.

Class Designations

The system used to designate ship classes is based on the U.S. Navy designation system. There are some modifications for clarity, however. Ship designations used and their meanings are as follows:

A/C=Aircraft	AVS=Carrier Supply Ship	CVS=Seaplane Carrier
AC=Collier	B=Pre-Dreadnought/Coastal Defense	DD=Destroyer
AK=Cargo Ship	BB=Battleship	DE=Escort/Frigate
AM=Minesweeper	BC=Battlecruiser	DL=Destroyer Leader
AMC=Armed Merchant Cruiser	BM=Monitor	IX=Unclassified
AO=Oiler	CA=Armored/Heavy Cruiser	LSD=Landing Ship Dock
AP=Transport	CB=Large Cruiser	LST=Landing Ship Tank
APD=High Speed Transport	CL=Light Cruiser	PG=Gunboat
AR=Repair Ship	CLAA=Anti-Aircraft Cruiser	PT/MTB=Motor Torpedo Boat
AS=Submarine Tender	CM=Minelayer	SS=Submarine
ATF=Fleet Tug	CV=Carrier CVL=Light Carrier	TB=Torpedo Boat
AV=Seaplane Tender	CVE=Escort Carrier	WPG=Coast Guard Cutter

A Note From Dave

For all those new naval hobbyists who have come into the hobby since Panzerschiffe began, the following is a brief history of our company... Our ships and 1/2400 scale itself began in 1970 for the purpose of fighting naval battles in an area like a ping-pong table. The existing 1/1200 ships were too large and expensive. Ships were desired that were rugged but plenty detailed for gaming. Thus, one-half of the 1/1200 scale was introduced. I made the Fiji, Bismarck, Gaalster, Salt Lake City, Graf Spee, Exeter, Leander, King George V, Hood, Prinz Eujan, and the H class destroyer as trial ships. By 1973, the ships had grown in numbers to 72 and we decided to advertise the ships for sale. My Tactical Game (TG) and Strategic Game (SG) were also released in 1973. Since then, others have joined the 1/2400 scale market with metal ships. Panzerschiffe, however, has grown to over 650 ships with most of them made exclusively by our company only.

We hope you enjoy our ships!

American Civil War Ships

These are designed for tactical level gaming and for use with hex grid games. They are very good for use with the popular game "Ironclads" by Yaquinto Publications. These ships turn scenarios into 3-dimensional battles!

Panzerschiffe Naval Gaming Systems

Our **"TG-3" tactical game** is a complete system of rules for tactical naval combat using miniatures of any scale. It covers the period 1890 to 1945 and contains data for 563 classes of ships from 19 countries. This system is an improved version of our highly acclaimed TG-2. It uses new randomization and torpedo methods which will make it a classic in tactical games. It still maintains the features of realism and rapid speed of play. TG can be played solitaire or with any number of players.

Our **"SG-3" is a strategic game** containing seven World War Two scenarios. The fleet contacts are meant to be fought using miniatures and tactical rules such as our TG, but a simple method such as War at Sea can be used. SG contains rules for converting map contacts to tactical battles, and also submarine and aircraft rules. The seven scenarios are based on actual situations. The play is done using hidden maps and requires a third person to act as judge. This provides realism for our strategic scenarios. The seven included games are: Bismarck, Arctic Convoy, Atlantic Raiders, Java Sea, Tokyo Express, Mediterranean, and Midway.
