THIS CATALOG PRESENTS THE PANZERSCHIFFE LINE OF 1/2400 SCALE WATERLINE SHIPS AND GAMES. OUR SHIPS ARE TRUE SCALE EPOXY CASTINGS IN REALISTIC COLORS. THEY ARE VERY DURABLE WITH NO PARTS TO ASSEMBLE OR LOSE. THEY CAN ALSO BE EASILY PAINTED WITH HOBBY PAINTS.

### A NOTE FROM DAVE...

**We have just introduced 21 new ships which are now available! They are highlighted in red in this catalog.**

For all those new naval hobbyists who have come into the hobby since Panzerschiffe began, the following is a brief history of our company... Our ships and 1/2400 scale itself began in 1970 for the purpose of fighting naval battles in an area like a ping-pong table. The existing 1/1200 ships were too large and expensive. Ships were desired that were rugged but plenty detailed for gaming. Thus one-half of the 1/1200 scale was introduced. I made the Fiji, Bismarck, Gaalster, Salt Lake City, Graf Spee, Exeter, Leander, King George V, Hood, Prinz Eujan, and the H class destroyer as trial ships. By 1973 the ships had grown in numbers to 72 and we decided to advertise the ships for sale. My Tactical Game (TG) and Strategic Game (SG) were also released in 1973. Since then others have joined the 1/2400 scale market with metal ships. Panzerschiffe, however, has grown to over 650 ships with most of them made exclusively by our company only. *We hope you enjoy our ships!*

## CLASS DESIGNATIONS:

The system used to designate ship classes is based on the U.S. Navy designation system. There are some modifications for clarity, however. Ship designations used and their meanings are as follows:

CV=Carrier	WPG=Coast Guard Cutter
CVL=Light Carrier	AMC=Armed Merchant Crsr
CVE=Escort Carrier	CM=Minelayer
BB=Battleship	LSD=Landing Ship Dock
BC=Battlecruiser	LST=Landing Ship Tank
B=Predreadnt/Cst Dfnc	A/C=Aircraft
BM=Monitor	AC=Collier
CB=Large Cruiser	AK=Cargo Ship
CA=Armord/Hvy Crusier	AM=Minesweeper
CL=Light Cruiser	AO=Oiler
CLAA=Anti-Aircraft Crsr	AP=Transport
DD=Destroyer	APD=High Spd Transport
DL=Destroyer Leader	AR=Repair Ship
DE=Escort/Frigate	AS=Submarine Tender
TB=Torpedo Boat	ATF=Fleet Tug
SS=Submarine	AV=Seaplane Tender
PG=Gunboat	AVS=Carrier Supply Shp
PT/MTB=Motor Torpedo Boat	IX=Unclassified
	CVS=Seaplane Carrier

## PANZERSCHIFFE NAVAL GAMING SYSTEMS...

**TACTICAL GAME...** The "TG-3" is a complete system of rules for tactical naval combat using miniatures of any scale. It covers the period 1890 to 1945 and contains data for 563 classes of ships from 19 countries. This system is an improved version of our highly acclaimed TG-2. It uses new randomization and torpedo methods which will make it a classic in tactical games. It still maintains the features of realism and rapid speed of play. TG can be played solitaire or with a number of players.

**STRATEGIC GAME...** The "SG" is a strategic level game containing seven World War Two scenarios. The fleet contacts are meant to be fought using miniatures and tactical rules such as our TG, but a simple method such as War at Sea can be used. SG contains rules for converting map contacts to tactical battles, and also submarine and aircraft rules. The seven scenarios are based on actual situations. The play is done using hidden maps and requires a third person to act as judge. This is the **ONLY** way realism can be put into strategic games. The seven games are: Bismarck, Arctic Convoy, Atlantic Raiders, Java Sea, Tokyo Express, Mediterranean and Midway.
